DATASHEET

APACHE® Volume Scanning Systems by AKL-tec

APACHE® s9

Integration in the existing material flow

- Measurement of cargo in almost any size or shape
- Automatic measurement of cargo and documentation with a camera
- 2 laser scanners in a measuring tower detect the object, optional camera takes a photo-realistic image of the cargo
- Transfer of the data to the customer data base – length, width, height and photo are automatically transferred to your system through defined interfaces
- Combination with a wrapping machine with rotating plate

Technical data

Product Dimensions*
Tower: 55 cm x 55 cm x 260 cm
The dimensions of a wrapping machine depend on the manufacturer

Measuring Area*
150cm x 150 cm x 250 cm

Precision*
2 cm / 2 cm / 2 cm

Confidence Level 95%

Minimum package size*
20 cm × 20 cm × 20 cm

Measuring time
ca. 5 additional rotations required depend on the wrapping machine

Power Requirements
200-250 VAC 16 A

Laser Safety Class
1
(safety measures are unnecessary even in case of continuous irradiation)

*L x W x H
