<b>Operating Conditions</b>	<b>Temperature:</b> 0°C to 40°C <b>Humidity:</b> 0% to 90% non-condensing
<b>Display</b>	digital display

As the latest member of the APACHE product family, this device expands our product range to the measuring and weighing of textiles on coat hangers. The foldable device delivers precise measurements of textile hanger goods in combination with a scale. The APACHE Apparel Dimensioner can be used for the acquisition of master data, storage space optimisation and choice of packaging. The included connections enable the user to connect a PC or laptop for displaying and processing the gathered data. Useful accessories such as a barcode scanner and label printer make the device a complete volume detection and weighing system. The APACHE apparel dimensioner is a versatile and powerful solution for the volume and weight detection in textile industry.
