

Automatic label dispenser redtagger T-100

A universal label dispenser that labels quickly and reliably

The redtagger T-100 is an automatic label dispenser and is operated with pre-printed self-adhesive labels in roll format. It is designed without restrictions for 3-shift operation and can meet a wide variety of requirements with its various application variants.

T-100 can be used both in stand-alone operation and in combination with machines and systems that require several label dispensers.

The system consists of two main assemblies: 1. The T-100 label dispenser, 2. The separate control interface. This facilitates integration into existing environments.

T-100 is available in an LH and an RH variant. The robust design of the system guarantees smooth operation in continuous use.

Features

- Can be used in all industrial sectors
- For pre-printed self-adhesive labels
- Many different label formats

Advantages

- Automatic application of labels
- Faster and more accurate labeling
- Simple Interfaces
- Very good cost-benefit ratio
- Ease of maintenance due to optimized, easily accessible design
- Demand-oriented energy consumption
- Developed and adapted control system, specially designed for specific applications
