

APACHE[®] KEE

All-in-one solution for the measurement of fruit and vegetable crates

- Advanced detection of logistical features of any kind of crate
- Two highly precise stereo cameras take measurements with a precision of a few millimeters
- Recognition of predominant features and verification of structural integrity
- Photographic documentation of measured objects
- Transfer of the acquired data to the customers data base – length, width, height, photo and weight are handed off to your system through defined interfaces
- Detects the presence and size of:
 - stacking lugs
 - edges
 - corners

Technical data

Product Dimensions

180 cm x 200 cm x 210 cm

Max. object dimensions*

62 cm x 42 cm x 35 cm

Scale

Integrated scale technology with a division of 1g

Power Requirements

400 VAC 16 A

*L x W x H (other dimensions possible)
